Product Description

In supermarkets and stores, we see traditional signs like this all the time. It could be a light box, a wooden plaque, an acrylic or cardboard billboard that conveys a message to the customer. In the past, store managers did not see anything wrong with the billboards. When new technologies and modern products were introduced to the commercial market, luminous letter lamps were introduced, and their diverse shapes, multiple colors, multiple mounting methods, easy substitution of letters, and luminous, illuminated features made the product stand out and gain attention in the commercial market.

It brings a traditional business environment with new highlights and an immersive atmosphere for creativity. In supermarkets, the messages are much more eye-catching and changeable, and it is extremely easy to change the messages so often that the supermarket counter could be changed every day. In the bar, the variety of lettering and rich lettering colors glow warmly in a dark environment, creating a colorful space. It's a great way to set the mood at the bar. The use of this letter lighting can give commercial organizations an excellent competitive advantage in the current intense business competition.

We have just launched a revolutionary new product - Multicolor letter lighting. This product is the future of lettering, as you can create your own terms on this bar and edit them at any time. In addition, you can equip the bar with a series of icons and even spotlights to display your products. The Multicolor letter lighting is suitable for almost any type of business. After obtaining the patent for our new product, we were already present at the Light + Building 2022 trade fair in Frankfurt am Main, Germany, MATELEC 2022 in Madrid at IFEMA, and Hong Kong International Lighting Fair (Autumn Edition), China.

With this innovative product, you can customize fonts, numbers, icons and even create your own company logos. This innovative product offers completely new opportunities to differentiate yourself from the competition. Its adaptability makes it perfect for communicating, drawing attention to special offers or as a sign to help customers find their way around your shop.

The Multicolor letter lighting can be used for any type of business. It can be used with absolute flexibility. If you have a bar or café and want to quickly inform your customers about drink and food offers, or if you want to inform your customers about fast-moving special offers in your shop. There are endless possibilities with words, and icons or lights to draw attention to your product or service and differentiate you from your competitors. It is an interior product that stands out for its illumination, as you can combine illuminated letters, icons with lamps too. It is perfect to brighten up your environment.

Installation

1 . Ceiling Hanging

The letter lighting can be installed on the ceiling with height-adjustable cables and struts easily.

2 . Wall Hanging

It can be easily screwed to the wall horizontally or vertically.

3 . Other multiple forms of installation

By using a threaded rod, it can be mounted on various surfaces of the object to create a variety of shapes.

Connections

A connector is attached to the body of the letter lighting. The connector is attached to a square slider that is embedded in the guide rail. The letter lighting can be pushed left and right on a guide rail, can be rotated at any angle. When powered on, the letters light up.

Material

Guide Rail

The guide rail is made of aluminium and the attachments are brass.

Letters

The letters are made of polycarbonate and white or coloured aluminium. Their interior consists of LED modules. They can be white or coloured.
