Internet of Everything

Internet operating system base on the wisdom of the tencent building management platform development, the depth of the adapter wisdom construction scenario of the Internet of things kind of operating system, for the building of hardware, applications, services and other resources, management and digital content and services, power digital and intelligent transformation, the real estate industry to improve the quality of construction operation efficiency and service, Create a new service model and user experience.

Super AIoT Platform

Internet of Things system integration service based on Tencent AIOT platform
Provide comprehensive professional intelligent solutions

Relying on Tencent Hillhouse operating system of things, Tencent artificial intelligence, cloud computing, big data analysis, face recognition and other cutting-edge technologies in the industry, focusing on smart home solutions, it gradually extends to smart army building and smart community application, and finally builds a smart city ecosystem with Internet of everything.

Wellgreen

Industry digital solutions provider

Wellgreen Technology Incorporation Headquartered in Dongguan Songshan Lake, is a leading industrial digital solution provider with R&D centers and production bases in Shenzhen, Guangzhou and Dongguan. Relying on the mainstream AIoT platform such as Tencent, the company has always been committed to maintaining innovation and forging forward in the spirit of enterprise. Relying on the mainstream AIoT platform such as Tencent, the company has developed the overall solution combining the Internet of things application software and intelligent hardware, and is committed to providing customers with the whole chain digital services in the fields of smart home, smart office, Smart park .

Smart Home System Joint development

Tencent Lianlian smart home system

Tencent Lianlian is a set of C to B open platform services provided by Tencent Cloud for the Internet of Things industry. It covers the Internet of things infrastructure of "cloud – tube – edge", and provides a full range of Internet of things products and solutions for the two main Internet of things circuits of consumer application entry "consumer Internet of Things" and "Industrial Internet of Things".The cooperation between the two parties has realized the linkage between users, devices and services, enabling users to control hardware products of different manufacturers and different protocols through wellgreen App (small program) and gateway, and to experience a beautiful and convenient intelligent life.

Core competence

Tencent brand The safe and stable

Built based on Tencent Cloud AIoT platform
The system is secure, stable, and has high concurrency
Tencent cloud IoT, LinkBase joint solution

Non-inductive smart Black science and technology

World-leading millimeter wave sensor technology
Human body detection and linkage system can save energy automatically
Non-sensory interaction, autonomic adaptation, autonomic perception

The quality of apple The international first-class

Adopt the same quality standard as Apple
Minimalist and extreme design requirements
High appearance level, high quality, high cost

High-end custom Automatic production

Fanuc unmanned automatic production
Efficient manufacturing, reduce costs
Fine management, excellent quality

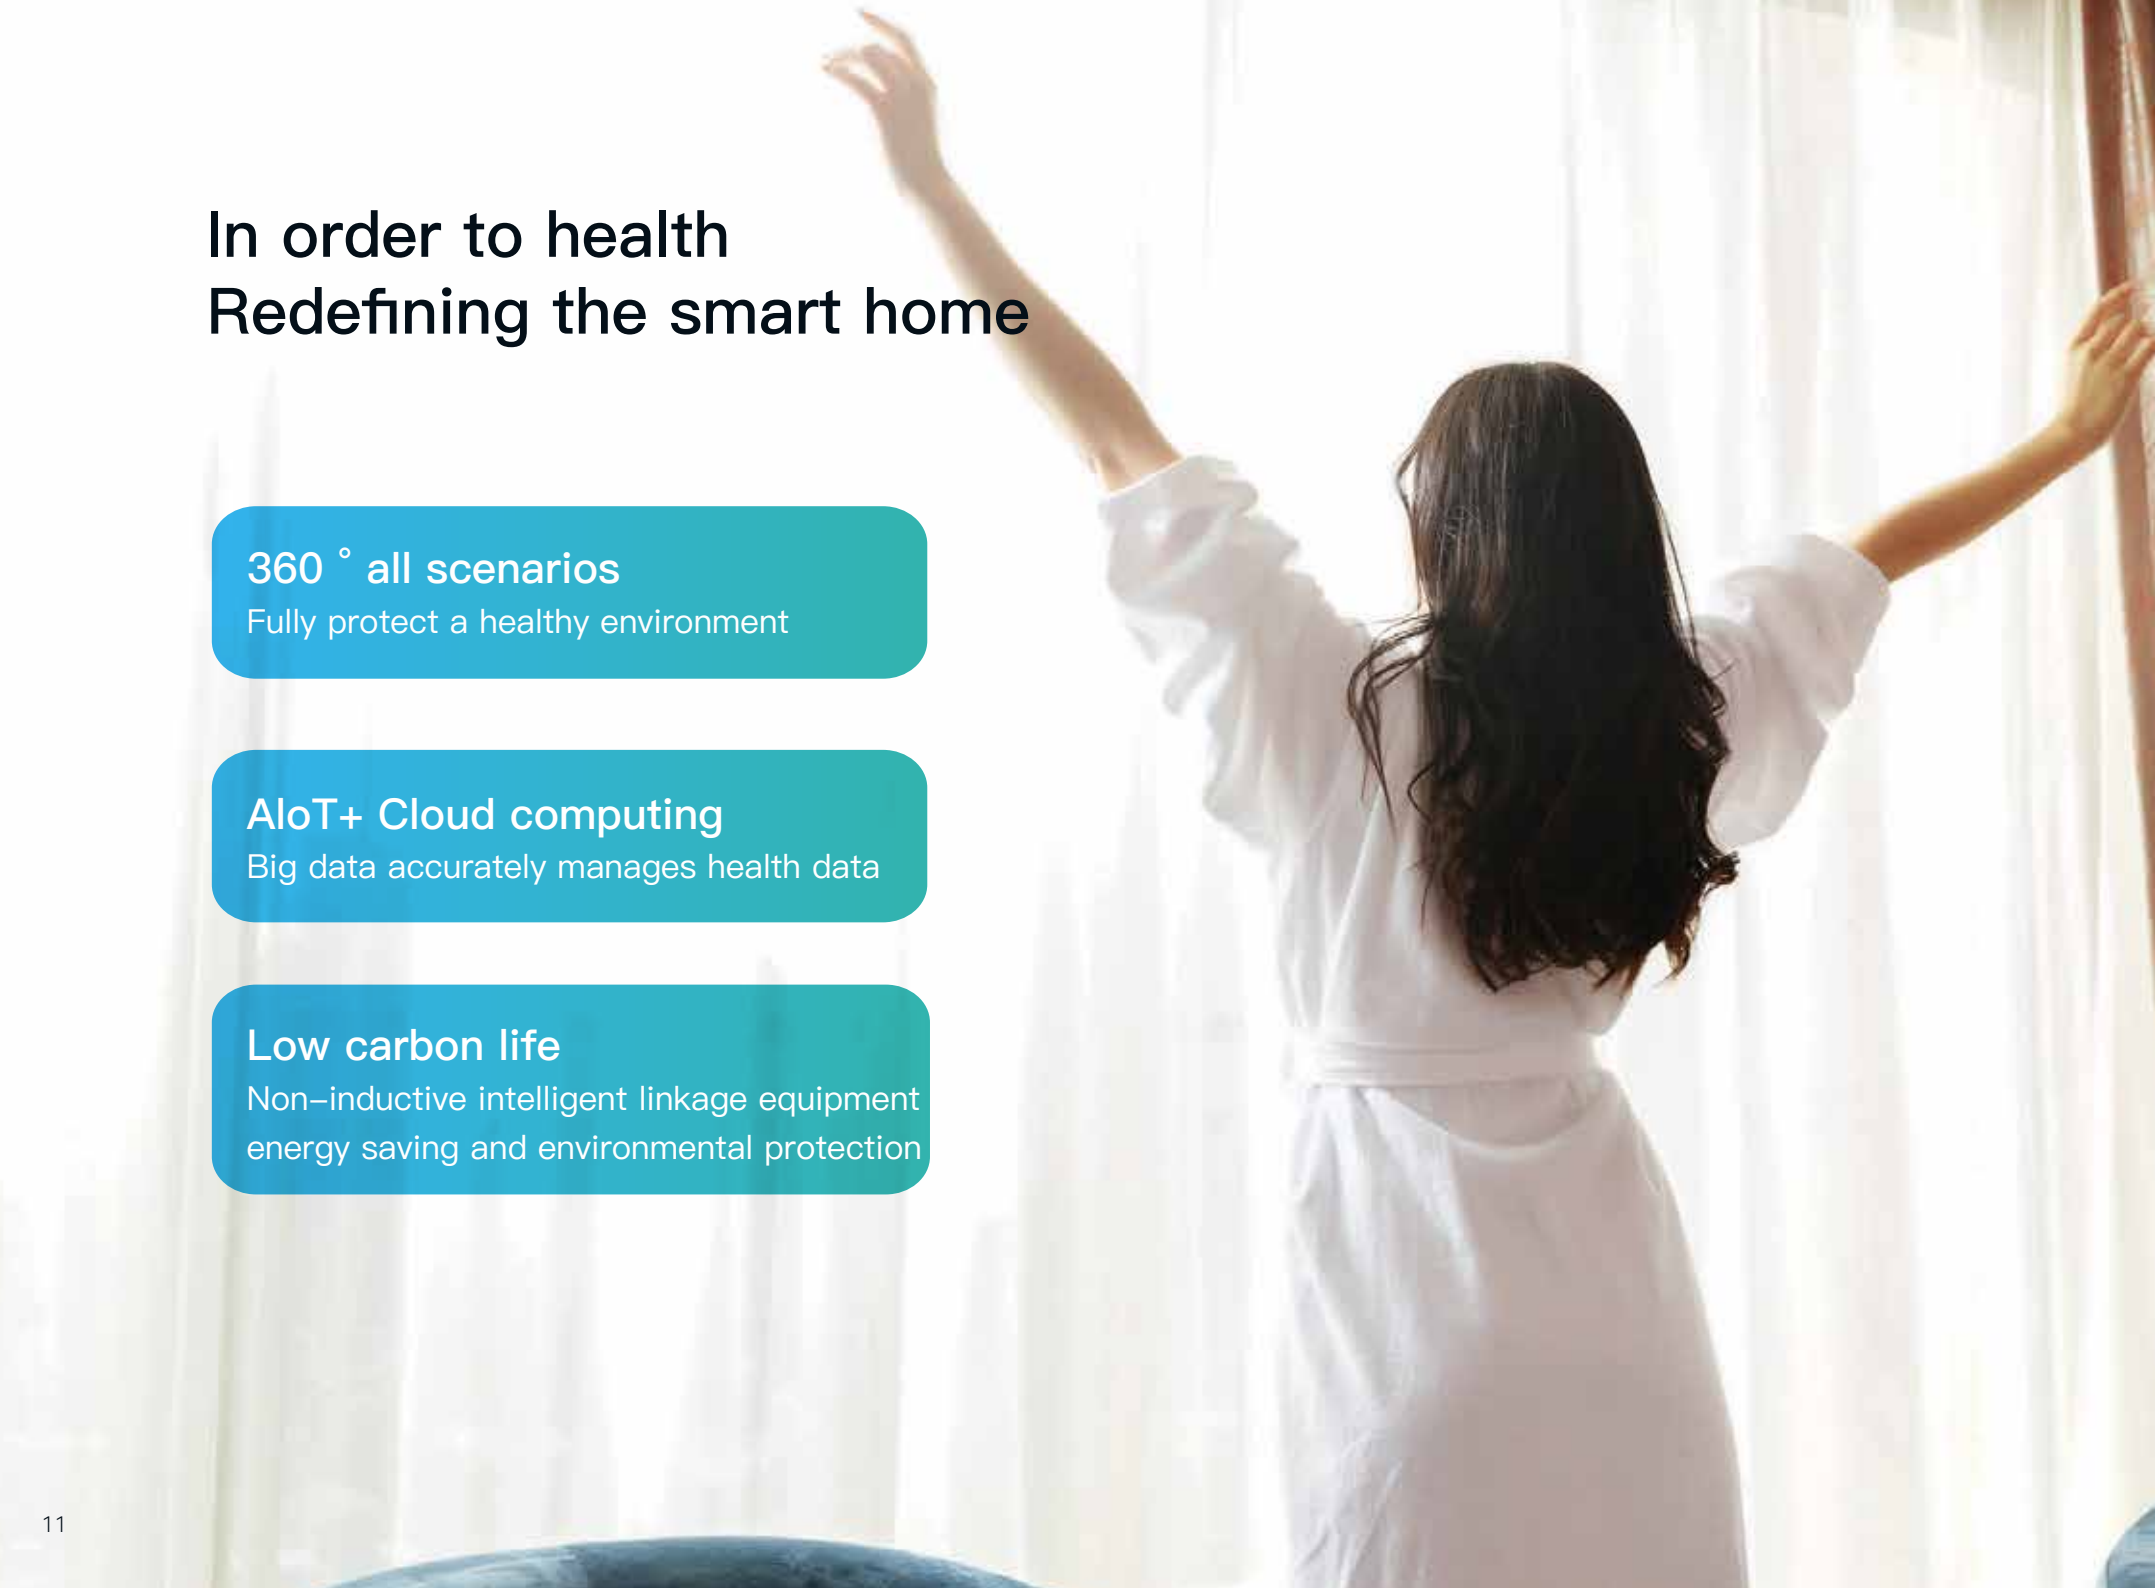

More intelligent More healthy

Time wise enjoy

07:00

Get out of bed model

The electric curtains slowly open and awaken to the sun and music.

07:30

Patterns from home

One key deployment, remote online view home situation, found abnormal immediately alarm.

16:00

A healthy environment

Real-time detection of indoor air quality and temperature and humidity, start the fresh air system automatic adjustment.

18:30

Home mode

Open the intelligent door lock, linkage lights, air conditioning, TV and other automatic opening

19:00

Happy Dinner

Smart speakers allow you to learn and play music as you go.

21:00

The Leisure Entertainment

Curtain, light with custom mode open, let you place yourself in a variety of entertainment mode.

23:00

Sleep Patterns

The curtains close automatically, the air conditioner automatically adjusts the appropriate temperature, and the music helps you fall asleep quickly.

24H

The Clock

24 hours monitoring, control the situation at any time. If you find any safety problems, call the police immediately.

Healthy life intelligent guardian

Smart Lighting

Combined with the indoor lighting demand at different times, automatic control and custom setting of light switch, adjust the light and shade and color change. As long as the Smart switch and Smart lamp linkage control, you can create different scenes of home atmosphere.

Genius Intelligence Screen

Smart lighting

Smart Switch

RGB lamp

Smart lamp tape

Smart tube light

Receive a visitor pattern

When everyone is seated, the light brightness is gradually reduced to 50%, which is conducive to relaxation and pleasant communication.

Interactive Sleep Aid

3000K warm light fading out and soothing music interaction, create a good sleep environment.

Healthy reading

Use low-frequency flash and non-glare light source to enhance the comfort of the reading environment.

Smart security

When you go to work, the device is like your own avatar, which can master home security: intrusion timely reminds users: remote care for the elderly, children and pets. A variety of ways to protect the safety of the family, love the family will never be absent

Smart camera

Infrared body sensor

Smart emergency button

Door and window switch sensor

Smart door lock

Electronic cat's eye

Protection from home

Every time you leave home, automatically open the defense, cameras and sensors guard all day.

Care for all ages

Monitor and capture the human form, sense the state of the elderly at home, remind the fall, two-way voice to accompany the growth of children.

Duress alarm

The smart door lock preset alarm fingerprint, immediately send a message to the emergency contact alarm.

Smart Sunshade

Simulate sunrise mode, wake you up in the morning, start a good day. Use a phone APP, voice control, wireless remote control or a preset scene to switch the curtain on and off.

Smart curtain switch

Smart curtain motor

Smart curtain guide

Light illumination sensor

Household is prevented bask in

Presets close the curtain regularly, prevent furniture to be basked in below STRONG light.

Shading and heat insulation

Voice control curtain, reduce solar radiation heat into the room, alleviate indoor high temperature, reduce air conditioning power consumption.

Naturally wake up

In sync with your morning time, slowly open your curtains and let natural light wake you up.

Smart hutch

Cooking soup, voice control switch, no need to touch wet hands; 24 hours detection of flammable and explosive gas; When going out, I can also pay attention to kitchen safety in time to find the source of abnormalities. A variety of installation methods, easier to use.

Gas leak sensor

Smoke sensor

Carbon monoxide sensor

Water sensor

Feed into wall metering socket

Gas monitoring

Indoor gas exceeds the standard, emergency notification window ventilation, to prevent gas poisoning and fire.

Water leaking

Forget to turn off the water, or water leakage in the home, can detect the situation inside the remote control water valve, to prevent water flooding Jinshan.

The remote contro

When you leave for home, remotely turn on the bathroom heating, you can enjoy a comfortable bath when you get home.

Smart environment

Test indoor temperature and humidity, let the indoor winter cool summer; Sensing air subtle changes, automatic window ventilation; Easily control the indoor environment changes, so that the home becomes more healthy and comfortable.

Temperature and humidity sensor

Infrared body sensor

Smart infrared repeater

Feed into wall metering socket

Air conditioner

Smart curtain

Keep your home warm

According to different seasons, automatic constant temperature and humidity, enjoy warm winter and cool summer at home.

Air quality monitoring

When PM2.5, VOC and other pollution exceeds the limit, the alarm will be triggered, and other smart devices will be activated.

Electrical home appliances control

No longer look around for remote control, through the infrared repeater, remote control home appliances at any time.

Smart health

Sleep late at night, real-time monitoring sleep status; Morning wash excitement, intelligent magic mirror open real-time news broadcast, weather forecast; The APP makes good living habits based on health data. A variety of monitoring devices provide you with comprehensive care of everything from your body, blood pressure, heel sleep to your diet.

Smart Magic Mirror

Smart body fat meter

Smart blood pressure monitor

Smart toothbrush

Smart Sleep Detector

Health care

Through the smart magic mirror show family body management advice, always maintain a healthy physique.

Scientific monitoring

Master BMI, body weight, fat percentage, blood pressure and other data, and realize routine physical examination at home

Management of sleep

Test the number of turning over during sleep, provide light sleep data, and analyze sleep quality.

Smart video

Family party, meet karaoke, games and other entertainment; Voice control switching, massive audio and video arbitrary selection; Stereo surround sound, from soft whispers to thrilling explosions, allows you to experience immersive viewing.

Smart Music Panel

Bluetooth speaker

Smart bar sound system

Private cinema

Build a 3D surround sound, create a visual and auditory ceremony, to meet a good show.

Party entertainment

Live karaoke, music carnival, birthday wishes, accompany family and friends lively festival.

Acoustic intelligence

With sound playback, massive music, TV resources arbitrary selection.

Smart irrigation

Master real-time climate data to water as needed, care for every plant; APP remote control, pay attention to the growth of plants; Record the changing seasons.

Insecticidal extermination

Ambient sensor

Soil sensor

Water and fertilizer integration

Smart irrigation

Smart watering

Test the soil condition, precise control of water watering flowers and plants.

Remote viewing

Anytime and anywhere, the APP can check the growth of flowers and plants and record the beauty of flowers and plants in full bloom.

The holiday management

Travel vacation, set watering time, watering plants on time.

Wisdom space

Take good care of your family

The core of smart home should be "home" and "home", care for family and residential environment, give family customized care, give space intelligent setting.

Family · Customization

Different living habits of family members, wellgreen smart home will give the most intimate care to children: according to the living situation of family members, tailor-made safe, good living, healthy and noble smart home solutions.

Scene · smart switching

Have RICH INTELLIGENT SYSTEM, IN the home ALL A SPACE, according to the change of scene setting. You can switch scenarios intelligently at will.

The smart kitchen can experience and control all the equipment in the kitchen in an all-round way, and listen to music while cooking, and cook a delicious meal in a happy time.

Abnormal prompt

Gas sensor, water sensor and smoke sensor ensure that the home safety status is clearly displayed on the App. In case of any abnormality, alarm information will be sent immediately to inform the user and the property.

Wisdom of the bathroom

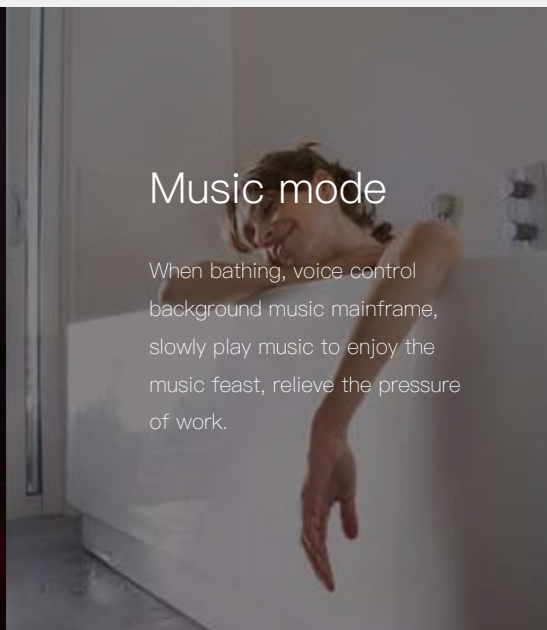

Health management, voice interaction

Comfortable sleep atmosphere, in the light music gradually fall asleep, promote efficient sleep. When the curtains are opened in the morning, natural light slowly pours into the room, starting a wonderful day.

Health management

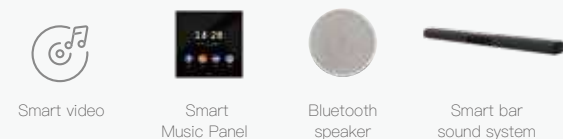

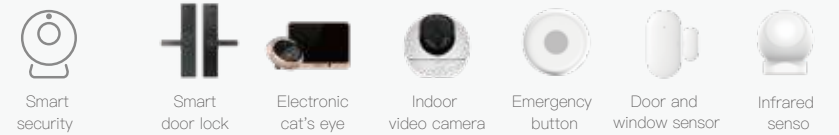

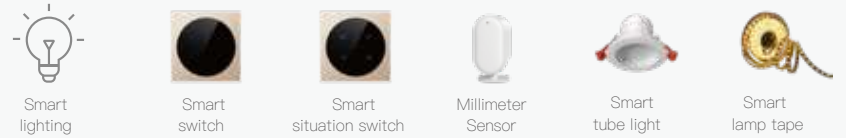

Go to the smart mirror when you wash, analyze your health data, and get rid of illness by improving your diet and exercise.

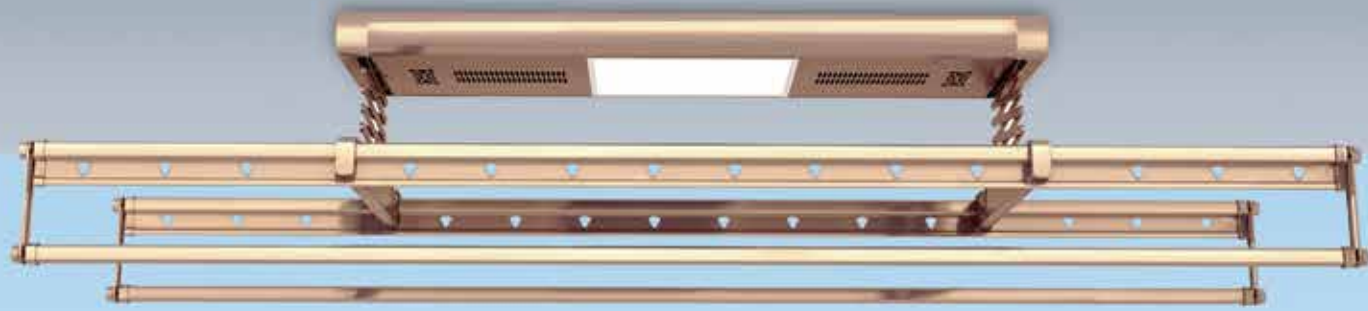

Music mode

When bathing, voice control background music mainframe, slowly play music to enjoy the music feast, relieve the pressure of work.

Smart Suits

Wisdom of the balcony

Sensing climate and air conditions
Automatically open and close curtains in real time

Open Windows in the morning, natural ventilation circulation, keep the indoor air fresh; Close Windows in rainy days, intelligent guard, no need to worry about rain into the window outside: real-time monitoring of window safety, to avoid accidents. A variety of control modes, easy to automatically open and close the curtain, fast and convenient, time and labor saving, go out without worries.
