TIANXING TECH INNOVATION CO. PTE LTD

Seafood Expo
ASIA

The Ocean Have a **Profound on Our Lives** **All Over the World.**

The leading provider of aquatic raw materials and processed products is dedicated to supplying the world's primary aquatic resources and processed products sourced from Asia, Europe, Central and South America. Tianxing Tech Innovation Co., PTE Ltd, a Singaporean company, serves as the group's primary stronghold in Southeast Asia. Our headquarters primarily sources South American white shrimp, shrimp from Honduras, Nicaragua, Ecuador, Indonesia, Bangladesh, Sri Lanka, as well as Argentina, Dubai, Northern Europe, Norway, Poland, the United States, Russia, and Africa for the export of aquatic products.

Our product range includes salmon, tiger grouper, lobster, blue dragon crab, red snapper, mackerel, scallop, leucorrhea sardines, and various processed fish fillets, which are exported to Europe and the United States. Additionally, we maintain headquarters in Taipei, Taiwan, Guangdong Province, Vietnam, and Indonesia. These locations facilitate the provision of semi-finished products, quick-frozen aquatic cooked foods, and canned products to aquatic food factories.

In the United States, we operate aquatic import companies in Florida. Our primary corporate objective is to empower aquatic food consumers worldwide by offering high-quality aquatic products through our network of agents. Our key aquatic offerings encompass sturgeon, available whole, frozen, or as frozen round sturgeon, including gills and internal organs.

We have nurtured enduring partnerships with fishermen, aquaculture farms, sea fishing companies, and aquatic processing plants. Our commitment to these collaborations ensures a consistent supply of aquatic products to various aquatic product factories.

Our Products

Every single day we seize the challenge of improving the way we source, process and produce seafood products. We look at the gaps, identify opportunities and collaborate with partners to create fresh ideas. We create better tasting, exceptional quality fish and seafood for today and the future.

We list our products into 4 categories, Tuna, Fish, Chepalopods, and Others.
